Informativa Cambio Spessore – 60x120 9mm to 8mm
Thickness Change Notification – 60x120 9mm to 8mm

Nel corso del 2026, il formato 60×120 della gamma Atlas Concorde Solution sarà progressivamente disponibile nello spessore 8 mm, in sostituzione dell'attuale 9 mm.
Questa evoluzione consente di allineare il formato 60×120 agli spessori già adottati sugli altri principali formati della gamma, migliorando la coerenza complessiva e la razionalizzazione dell'offerta.
Il passaggio rappresenta inoltre un'opportunità concreta per:

- accedere a condizioni economiche più competitive, già recepite nei prezzi del presente listino, in particolare nei progetti di ampia scala;
- ottimizzare i carichi e aumentare l'efficienza logistica;
- rafforzare il posizionamento distintivo tra le gamme Atlas Concorde e Atlas Concorde Solution.

Precisiamo che tutte le caratteristiche tecniche dichiarate rimangono invariate.
I nuovi codici articolo saranno introdotti progressivamente nel corso del 2026, in funzione dell'esaurimento delle attuali disponibilità in spessore 9 mm.

During 2026, the 60×120 size within the Atlas Concorde Solution range will be progressively available in 8 mm thickness, replacing the current 9 mm.
This evolution allows the 60×120 size to be aligned with the thicknesses already adopted across the main formats of the range, enhancing overall consistency and streamlining the product offering.
The transition also represents a concrete opportunity to:

- benefit from more competitive pricing conditions, already reflected in this price list, particularly for large-scale projects;
- optimize loads and improve logistical efficiency;
- strengthen the distinctive positioning between Atlas Concorde and Atlas Concorde Solution ranges.

Please note that all declared technical performances remain unchanged.
The new item codes will be progressively introduced throughout 2026, in line with the depletion of current 9 mm stock.
